

Project Proposal

Web Development – CS 290

Christopher Eckerson

Project Proposal Current Idea: Although the design may change as the project progresses, I would like to design a personal page to showcase past and present academic achievements and projects. In addition to general information, this design is more modeled after a blog so that I will continue to add more content and be able to share with others. This design is also more flexible to meeting the requirements of the assignment than other project ideas I have considered and would be incredibly useful.
